

SUPPORT NAVIGATION

Connecting you to services and resources

Support Navigation is a newly created service for people with developmental disabilities in Hamilton County. It has the same classification as a Service & Support Administrator (SSA) with a slightly different approach.

Support Navigation is for people who receive minimal or no supports but want to maintain a Hamilton County Developmental Disabilities Services (HCDDS) contact should their needs change in the future. This team will support people who are eligible for county board services but do not have ongoing needs that would require a traditional SSA and yearly individualized service plan.

Our Support Navigation team will regularly check in with people on their caseloads to ensure their needs are being met and they are connected to needed resources. Support Navigators work closely with other teams at HCDDS so each person can access the services and supports they need.

Support Navigation can assist with:

- Finding housing that fits your needs
- Applying for and maintaining Social Security and other public benefits
- Volunteering in your community
- Support at school or in college
- Other support needs you might have

If you would like Support Navigation services, contact our Introduction & Eligibility team at (513) 559-6990 or intro@hamiltondds.org to discuss how your needs can be met.
